

## T8GP150

Tubo Led de vidrio con recubrimiento de PET

### Producto

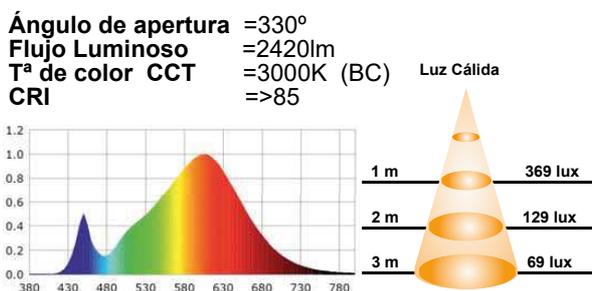

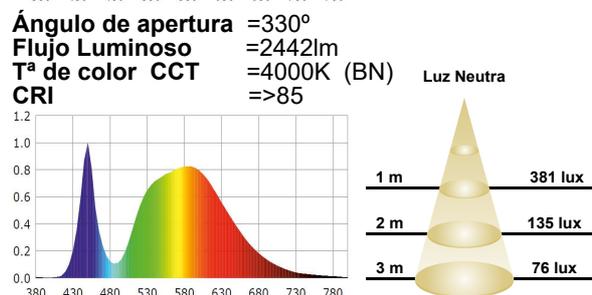

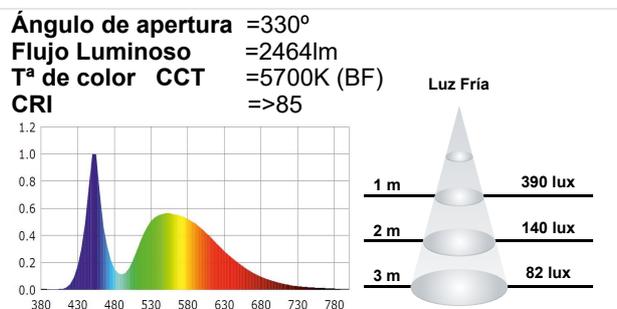

### Dimensiones

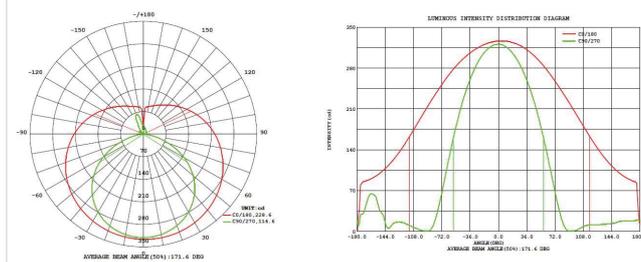

### Datos Técnicos

|                        |   |
|------------------------|---|
| Entrada:               | 175~240Vac 50-60Hz                        |
| Potencia:              | 22W                                       |
| Nº de LEDs:            | 120 chips SMD 2835                        |
| Factor Potencia:       | >0.90                                     |
| Eficiencia Lumínica:   | 112 lm/w                                  |
| Potencia LED:          | 0.18W                                     |
| Flujo Luminoso:        | 2464lm (BF)<br>2442lm (BN)<br>2420lm (BC) |
| Intensidad Lumínica:   | 310cd                                     |
| Grado de IP:           | IP40                                      |
| Temp. Trabajo:         | -10°C +40°C                               |
| Nº Conmutaciones:      | 15.000                                    |
| Certificaciones:       | CE, RoHS                                  |
| Eficiencia Energética: | A+  |
| Vida útil:             | 30.000h (L70:B10)                         |
| Peso:                  | 320 gramos                                |

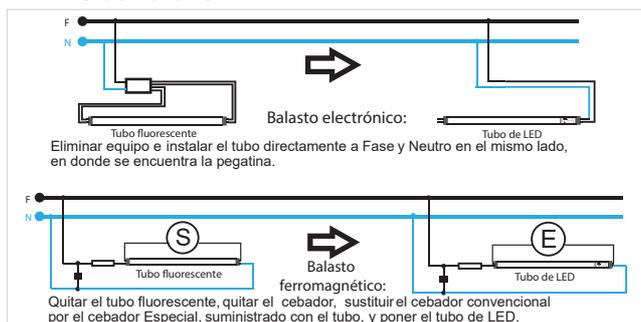

### Datos Fotométricos

Curva de distribución Luminosa

### Instalación

Chip utilizado
